

Michael Koetter

Vice President, News Technology Planning and Development, CNN

Biography

Michael Koetter is Vice President of News Technology Planning & Development for CNN. In this role, he oversees strategic technology planning and production systems development for CNN's newsgathering, production & distribution operations. His broad knowledge of IT, broadcast & production technologies has aided him in guiding CNN's worldwide transition to file based video acquisition and production. Michael manages CNN's Broadcast Production Systems development team, responsible for building systems at CNN which include file-based video contribution, HD production, media management and digital archival.

Michael is based in Atlanta and reports to Bob Hesskamp, CNN's SVP of Broadcast Engineering and Systems Technology group.
