

Mike Mihalik

Project Director, LaCie

Title

Storage Performance for Content Creation, Editing, and Production

Abstract

What's needed for pros and semi-pros? There are a variety of solutions available, and a critical look at needs will determine what is necessary vs. nice-to-have depending on the platform, application, and the environment. Comparing solutions based on USB, FireWire, eSATA, Fiber, and iSCSI solutions for video applications.

Biography

Mike Mihalik has been with LaCie since 1992, with marketing, engineering, and manufacturing responsibilities in a number of roles. He has led the development of many storage and color products. Today, Mike's focus is on expanding LaCie's business to offer products that satisfy our customer's insatiable desire for digital storage.
