

2011 Creative STORAGESM CONFERENCE

June 28th 2011 at the DoubleTree Hotel, Culver City, California

AN ENTERTAINMENT STORAGE ALLIANCE™ EVENT

Matthew Rehrer, Product Manager, Production Storage, Harmonic

TITLE: Shared Storage Challenges and Opportunities in Production Workflows

ABSTRACT

Shared Storage Challenges and Opportunities in Production Workflows Multi-user collaborative production environments present significant opportunities for increased productivity and efficiency yet they pose unique performance and management challenges for storage infrastructure. Non-linear edit clients place complex multi-faceted performance demands on storage which only increase as that storage is shared. Taking advantage of the opportunities for collaboration requires not just the performance needed for NLE groups but also the infrastructure to manage media, projects, users, and storage resources. Find out how to evaluate systems and components in order to provide an optimal solution.

BIOGRAPHY

Matthew Rehrer Product Manager, Production Storage

Matthew Rehrer joined Harmonic via the acquisition of Omneon in 2010. Matthew's role at Harmonic continues the work he began at Omneon, providing direction for products that empower digital content creation, management, and delivery. Prior to joining Omneon in 2005, Matthew worked in Silicon Graphics' Telco Media Engineering team on asset management, media servers, and clustered storage. Prior to SGI he was part of an effort to productize production tools originally used in-house at Industrial Light and Magic.

Matthew holds a B.S. in Engineering from the University of California, Berkeley.
