AN ENTERTAINMENT STORAGE ALLIANCE™ EVENT

Tony Cahill, Chief Engineer, CET Universe

BIOGRAPHY

Tony Cahill is the chief engineer of CET Universe, a leading provider of services, systems, and products for professional audio and video production. He manages a team of experienced technology specialists that provide design, installation, sales, and service support for integrated workflow solutions within the post-production and broadcast industries. He oversees solutions delivery for HD/2K/4K workflows; telecine; facility bould-outs, and network-based solutions for the company's expanding line of shared storage solutions. Tony also manages a team that provides support for CET Universe's line of Apple products.

Prior to joining CET Universe, Tony was a regional business development manager with Intermec Technologies Corporation.

He holds a B.S. degree from Marquette University.
